

## **Web E-Government Domain Specific Principles:**

1. Websites and Web-based systems such as eGovernment, eCommerce and Web Content Management.
2. Should be driven by business principles and events.
3. Must always be in compliance with applicable Federal and State laws and regulations.
4. Must be developed and implemented using the appropriate [application standards](#) and security models based on data classification (Refer to [Security Domain Document](#)).
5. Should always be published with and adhere to a strict and valid privacy policy (Refer to [CT.gov Privacy Policy](#) for model).
